STATOTHR

[redacted] Contract [redacted]

Pursuant to subject contract the Contractor submits herewith an unsolicited proposal for a film accumulator and two 20,000 foot film reels to be included with the HTA/5 film processor procured under subject contract. The above units were not initially contemplated nor included in the scope of work delineated under the contract.

The Contractor's proposal PW-884 did not include an accumulator since the initial equipment configuration was negotiated on the basis that the processor would only be required to process one reel of film at any one time. However, subsequent technical discussions with Government personnel have indicated that the machine will be required to process continuously. In view of this change, the Contractor submits herewith a cost proposal covering the addition of [redacted] accumulator part no. 43684 to be incorporated in the HTA/5 Processor prior to delivery. This unit will permit film splicing during continuous and uninterrupted operations without damaging the film while in the processing cycle.

STATOTHR

The film loading console designed for use with the HTA/5 Processor was based upon the use of standard Air Force reels. In the process of finalization of the design of the film console, the Contractor was advised that a single standard configured Air Force reel did not exist and that the Contractor should design and furnish a film reel capable of handling 20,000 feet of film in widths ranging from 70mm to 9 1/2 inches. The Contractor's cost proposal attached hereto represents the cost required to design and manufacture two-20,000 foot film reels proposed for use with the film console.

SECRET

The foregoing cost proposal in the total amount of $23,848.00 is based upon the equipment being included with the HTA/5 Processor at time of delivery. It is respectfully requested that acceptance of the Contractor's proposal be initialed in the form of an Amendment to subject contract.

Very truly yours,

STATOTHR
